

Historic, Archive Document

Do not assume content reflects current scientific knowledge, policies, or practices.

A black and white photograph of a nursery. The foreground and middle ground are filled with numerous young, slender trees planted in neat rows. The trees have dense, leafy canopies. The background shows a bright, open area, possibly a field or a path, where the trees are less distinct. The overall scene is a well-maintained nursery.

MARQUETTE BLDG.
CHICAGO

INTRODUCTORY

Location

Our nurseries occupy 200 acres of rich rolling farm land at Glen View, Ill., seventeen miles northwest of Chicago, a forty-five minute ride on the C., M. & St. P. R. R.

Shipping Facilities

Being a suburb of Chicago, the greatest railway terminus in America, we can assure direct routing and prompt delivery.

Quality

Our land is kept thoroughly fertilized and carefully cultivated during the entire growing season.

We plant farther apart, fertilize more frequently, and transplant oftener than the average nursery because our business is founded on *quality*. That is why we produce the very finest stock—plants that are more sturdy, larger and better shaped, with plumper branches and completer root systems than those offered by the ordinary nursery and intended to sell in a price competition.

Large Specimens

Frequent reference will be found to extra large specimens which we will be able to furnish. This affords an unusual opportunity to secure matured plants, by means of which *immediate results* may be obtained.

Extensive Assortment

Our list is uncommonly large and contains more than 900 different varieties of trees, shrubs, vines, evergreens and old-fashioned perennials.

We carry such a large variety because it enables us to fill all orders from our own stock, no matter how many varieties are specified—thus avoiding for our patrons the uncertainty and inconvenience of applying to several nurseries for portions of such orders.

Tested Varieties

Every one of the varieties which we list has been tested and found perfectly hardy in northern Illinois. We have in this manner been able to secure a large number of valuable additions to the sorts usually offered in the ordinary nursery.

Prices

We will furnish fifty plants of same kind at hundred rates—five at ten rates. In listing our stock, we have stated exact sizes and price for each size, thus making it convenient for the purchaser to choose the specimen that exactly meets his requirements.

Measurement of Trees and Shrubs

All plants are measured as they stand in the nursery before digging. Measurements for height are taken from the ground to the top of the plant. In trailing plants the length of the branches is taken instead of the height. Measurements for caliper of trees are taken above the ground a distance equal to the diameter of the tree.

Guarantee and Planting

The experience, as well as reputation of Swain Nelson, & Sons Company, covering two generations, is the purchaser's surest guarantee of good values and square treatment.

For a reasonable additional charge we will plant and warrant all goods ordered from us. We will also design the scheme of planting, will arrange the grouping so as to secure the most harmonious effects and produce most pleasing contrasts of color and form. We send our expert gardeners to prepare the ground and plant the stock in a correct and scientific manner.

Packing

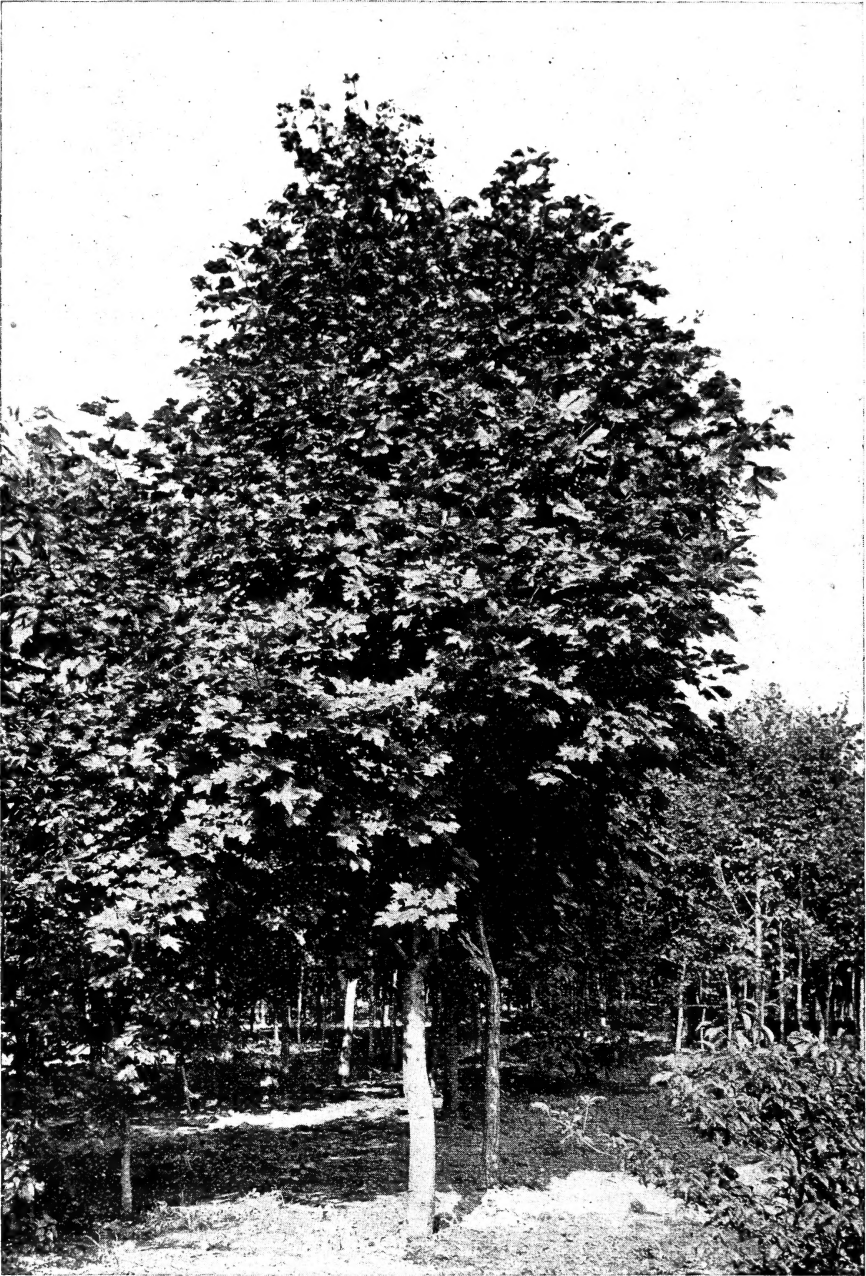

All goods are packed in the most careful manner, thus avoiding risk of damage if delayed in transit. The only charges for packing are for the cost of materials used.

State Inspection

Our nursery is inspected annually by the State Entomologist, and a copy of the certificate of the last inspection is sent with each shipment.

Errors or Omissions

We will adjust all mistakes in the execution of orders if notified immediately upon receipt of goods.

Norway Maple in Our Nursery.

TREES

Also 100 large specimens, 4½ to 7 feet high, \$4.00 and upward.

<i>Pinus sylvestris</i> —SCOTCH PINE.		
2½ feet high	2.25	20.00
3 " "	3.00	27.50
3½ " "	3.75	35.00
4 " "	4.50	42.50

Also 50 larger specimens 5 to 6 feet high, \$6.50 and upward.

<i>Pseudo-tsuga Douglasii</i> —DOUGLAS SPRUCE.		
3½ feet high	2.25	
4 " "	2.75	
4½ " "	3.50	
5 " "	5.00	

Also 100 large specimens, 5½ to 13 feet, \$7.50 and upward.

<i>Pseudo-tsuga Douglasii var. Coloradensis</i> — BLUE DOUGLAS SPRUCE.		
---	--	--

20 large specimens, 6 to 10 feet high, \$12.50 and upward.

<i>Taxus cuspidata</i> —JAPAN YEW.		
1 foot high	1.75	16.50
1½ feet high	2.50	22.50
2 " "	3.50	32.50

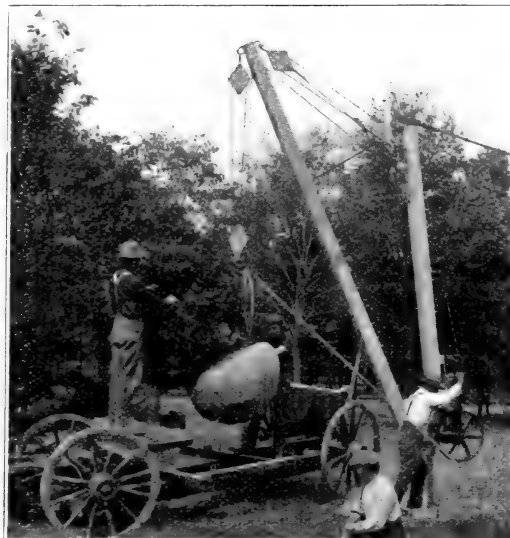

<i>Thuja occidentalis</i> —AMERICAN ARBOR VITAE.		
2½ feet high	1.00	7.50
3 " "	1.25	10.00
3½ " "	1.50	12.50
4 " "	2.00	17.50

<i>Thuja occidentalis var. aurea</i> — PEABODY'S GOLDEN ARBOR VITAE.		
2 feet high	2.00	
3 " "	3.25	
4 " "	5.00	

Also larger specimens.

	Each	Per 10
<i>Thuja occidentalis</i> var. <i>Columbia</i> — SILVER-TIPPED ARBOR VITAE.		
2 feet high.....	2.00	17.50
3 " ".....	3.50	30.00
4 " ".....	6.00	
Also 10 specimens 4½ to 5½ feet high, \$7.50 and upward.		
<i>Thuja occidentalis</i> <i>globosa</i> —GLOBE ARBOR VITAE.		
12 inches high.....	1.50	12.50
15 inches high.....	2.00	17.50
18 inches high.....	2.75	25.00
<i>Thuja occidentalis</i> var. <i>Hoveyi</i> — HOVEY'S ARBOR VITAE.		
18 inches high.....	1.50	12.50
3½ feet high.....	5.00	
<i>Thuja occidentalis</i> <i>plicata</i> — FAN-SHAPED ARBOR VITAE.		
2 feet high.....	2.50	22.50
2½ " ".....	3.00	25.00

Loading Evergreens in Our Nursery.

HARDY ROSES

SWAIN NELSON & SONS COMPANY

HYBRID PERPETUAL ROSES.

ALFRED COLOMB.	White.
BARONESS ROTHSCHILD.	Light pink.
CAPTAIN HAYWARD.	Carmine Crimson.
CAROLINE TESTOUT.	Flesh Rose.
CHARLES MARGOTTIN.	Dazzling crimson.
CLIO.	Flesh color.
FISHER HOLMES.	Crimson.
FRAU KARL DRUSCHKI.	White.
GENERAL JACQUEMINOT.	Crimson center.
GRUS AN TEPLITZ.	Fire red.
JOHN HOPPER.	Carmine.
JULES MARGOTTIN.	Cherry red.
KAISERIN AUGUSTA VICTORIA.	Creamy white.
KILLARNY.	Light pink.
MADAM GABRIEL LUIZET.	Silvery pink.
MADAM PLANTIER.	White.
MAGNA CHARTA.	Pink.
MAMAN COCHET.	White.
MARCHIONESS OF LONDON-DERRY.	Ivory white.
MARGARET DICKSON.	White, flesh center.
MARSHALL P. WILDER.	Cherry carmine.
MRS. JOHN LAING.	Soft pink.
MRS. R. G. SHARMAN-CRAWFORD.	Rosy pink.
PAUL NEYRON.	Deep rose.
PERLE DES BLANCHES.	White.

50c each. \$4.00 per dozen.

HYBRID RUGOSA ROSES.

BLANC DE COUBERT.	White.
COMPTE D'EPREMESNIL.	Lilac.
CONRAD F. MEYER.	Silvery rose.
MADAM GEORGE BRUANT.	White.
NOVA ZEMBLA.	White.
PROSTRATA.	White.
SIR THOMAS LIPTON.	White.

50c each. \$4.50 per dozen.

LORD PENZANCE'S HYBRID SWEET BRIERS.

AMY ROBSART.	Deep red.
ANNE OF GEIERSTEIN.	Deep rose.
FLORA MCIVOR.	Dark crimson.
LADY PENZANCE.	Rose.
LORD PENZANCE.	Lemon yellow.

50c each. \$4.50 per dozen.

AUSTRIAN OR YELLOW ROSES.

HARRISON YELLOW.	Golden yellow.
PERSIAN YELLOW.	Light yellow.

50c each. \$4.00 per dozen.

RAMBLING AND OTHER CLIMBING ROSES.

BABY RAMBLER.	Crimson red.

<i>Vinca Minor</i> (See Perennials).		
<i>Vitis heterophylla</i> (<i>Syn. Ampelopsis heterophylla</i>) —ASIATIC CREEPER.		
Strong plants.....	1.00	7.50
<i>Vitis heterophylla var. variegatus</i> (<i>Syn. Ampelopsis heterophylla elegans</i>)—VARIEGATED GRAPE.		
Strong plants.....	1.00	7.50
<i>Wistaria Chinense</i> —CHINESE WISTARIA.		
3-year plants.....	.75	5.50
4- " ".....	1.00	7.50

HARDY FRUITS

GLEN VIEW NURSERIES

The fruit trees in the following list are arranged as nearly as possible according to the season of ripening.

APPLE AND CRAB APPLE TREES.

	Each	Per 10
1 inch diam.....	1.00	7.50
1½ " "	1.50	12.50
2 " "	2.00	17.50

APPLE.

SUMMER.

Early Harvest.	Henry Clay.
Lievlund Raspberry.	Red Astrachan.
Yellow Transparent.	Sweet Bough.

AUTUMN.

Wealthy.	Duchess of Oldenberg.
Fameuse (Snow Apple).	Strawberry.
Peter.	

WINTER.

Patten Greening.	Bailey's Sweet.
Northwestern Greening.	Senator.
McIntosh.	Gano.
Talman Sweet.	King David.
Jonathan.	Stayman Winesap.
Pewaukee.	Delicious.
Grimes Golden.	

CRAB APPLE.

Whitney.	Martha.
Florence.	Transcendent.

CHERRY TREES. Each Per 10

1 inch diam.....	1.25	10.00
1½ " "	2.00	15.00
2 " "	2.50	20.00
Dyehouse—Very early.		
Early Richmond—Early.		
Montmorency—Late.		
English Morello—Very late.		

PEAR TREES (DWARF).

1 inch diam.....	1.25	10.00
1½ " "	2.00	15.00
Howell.	Anjou.	
Seckel.	King Karl.	
Fame.	Triumph.	
Duchess.		

PEAR TREES (STANDARD).

1 inch diam.....	1.00	7.50
1½ " "	1.50	12.50

2½ " "	3.00	20.00
Clapp Favorite.	Seckel.	
Bartlett.	Sheldon.	
Lincoln.	Kieffer.	
Flemish Beauty.	King Karl.	
Howell.		

PLUM TREES.

1 inch diam.....	1.25	10.00
1½ " "	2.00	15.00
2 " "	2.50	20.00
De Soto.	Imperial Gage.	
Surprise.	Omaha.	
America.		

SMALL FRUITS

	Per 10	Per 100
BLACKBERRY	1.50	10.00
Eldorado—Strong grower, fruit large.		
Rathburn—Very large berry.		
CURRENT	2.50	20.00
Red Cross.		
White Gondouin.		
GOOSEBERRY	3.50	30.00
Josselyn (Red Jacket)—Large, pale red.		
Pearl—Large, light yellowish green.		
Houghton—Small, light green.		

	Per 10	Per 100
RASPBERRY	1.50	10.00
Cumberland—Largest of black caps.		
Golden Queen—Best yellow.		
King—Early Red.		
Loudon—Largest red.		
GRAPE	3.50	25.00
Brighton—Red, sweet, early.		
Concord—Black.		
Diamond—White, very early.		
Moore's Early—Black, very early.		
Niagara—White.		
Pocklington—Late, white.		
Worden—Black, earlier and sweeter than Concord.		

HERBACEOUS PERENNIALS

			2 year old plants	.50	4.50
			large clumps	1.50	12.50

VARIETIES.

ALBA, white.	ROSA, pink.	RUBRA, red.			
<i>Paeonia hybrida</i> — PEONIES	May-June				
			1 year old plants.	.75	6.00
			2 year old plants.	1.25	10.00
			Large clumps	2.50	20.00

VARIETIES.

CANDIDISSIMA, white.
CHINENSIS ALBA, white.
CUPREA SUPERBA, pink.
DELICATESSIMA, delicate pink.
DUKE OF WELLINGTON, light primrose.
FESTIVA MAXIMA, pure white, red spots.
GOLDEN HARVEST, creamy pink.
JEANNE D' ARC, yellowish rose center.
LOUIS VAN HOUTTE, cherry red.
MARECHAL DE MACMAHON, violet red.

MARIE LEMOINE, sulphur white, shaded pink.
MODELE DE PERFECTION, flesh pink.
MONT BLANC, pure white.
POTSII PLENA, dark red.
PURPUREA SUPERBA, dark red.
QUEEN VICTORIA, pure white.
RICHARDSON'S RUBRA SUPERBA, deep crimson.
ROEM VON BOSKOOP, lilac rose.
SEAFOAM, creamy white.
SULPHUREA ALBA, white, yellow center.

<i>Papaver Nudicaule</i> — ICELAND POPPY	May-Aug.	1 ft.	yellow	.25	2.00

<i>Yucca filamentosa</i> — ADAM'S NEEDLE.....	July	6 ft.	white	.50	4.00

Hollyhocks in Bloom.

Yucca in One of Our Plantings.

DIRECTIONS FOR PRUNING AND PLANTING

Preparation of Ground

THE first essential to successful planting is a thorough preparation of the ground, either by deep trenching or by digging large holes, refilling them with good fertile soil, and having them well-drained.

Selection

The second essential is the selection of well grown trees, and shrubs, free from any blemish or weakness, and with an abundance of fibrous roots. Granted the above conditions large trees may be transplanted as successfully as small ones, and they will produce shade and ornament at once, instead of many years later, as is the case with ordinary nursery trees.

Planting

Before setting the tree all bruised or broken roots should be cut back to the sound wood with a sharp knife. The tops should be pruned in proportion to the roots that have been cut.

Our trees usually need very little pruning and our shrubs none at all.

The plant should be set not more than two inches deeper than it stood in the nursery, as indicated by the soil mark on the trunk. The roots should be spread out in their natural positions, and as the fine soil is covered over them it should be tamped down solid and rammed between the roots, making sure that no air spaces are left under the tree.

Watering

Water at time of planting only in case the soil is dry. Pour sufficient water into the hole after it is two-thirds full to thoroughly moisten the soil, allowing the surplus water to disappear. Then finish filling the hole and planting the tree. Loosen the wires which hold the labels to prevent future injury to the bark.

Care After Planting

To obtain the best results it is necessary to give the tree good care for a year or two after planting. When the warm weather sets in the tree should be mulched, that is, fresh manure, about four inches thick, should be spread around the tree to hold the moisture in the earth. When the weather becomes very dry the tree should be watered thoroughly every two weeks, and the soil about it kept loose by hoeing, as in a corn field.

Pruning

To the repeated inquiry as to the best time and method of pruning deciduous trees and shrubs, it may be answered, that no single rule can be laid down that will apply to all cases. Shrubs, like trees, are pruned for different purposes, and what is good practice in one case may be ruinous in another. A tree for the lawn requires different treatment from an avenue tree, and the rule for pruning an apple tree to induce an abundant yield of the best fruit would not apply to another tree where shade or ornament is desired.

For general purposes, therefore, neither trees nor shrubs should ever be cut back so far as to impair their vigor nor should they be pruned so as to destroy their natural outlines. They should rather have the weak shoots thinned out and their strong ones pruned cautiously so as to develop their best form.

Shrubs like *Spiræa Van Houttei*, which bloom early on wood of the previous year, where it is desired to secure abundant flowers, should not be pruned in autumn or early Spring, but immediately after the blooming season.

Shrubs that bloom late on wood of the current year, such as hydrangeas, roses, etc., should be pruned after the leaves fall in autumn or before they start in early spring.

One of Our Plantings on a City Lot.

AWARDED TO
SWAIN NELSON & SONS CO.
FOR MERITORIOUS DISPLAY
1905

Why Wait a Lifetime to Enjoy Your Trees and Shrubs?

There *was* a time when it took a generation to get any sort of mature effect from trees and shrubs planted on grounds of homes and estates, small or large. No other way existed for owners who wanted beautiful outdoor surroundings. After waiting fifteen to twenty years the plants that survived assumed some semblance of the real beauty and character wanted. But think of the trouble it took, the failures, and the enjoyment lost while waiting.

Home is Made Attractive at Once with Nelson's Trees and Shrubs

Now it is possible to have trees and shrubs that will make immediate display. Some of our big and stately trees at our Glen View Nurseries are twenty-five years old, and our shrubs will bloom and be effective at once. All have been perfectly trained, pruned and matured, and transplanted repeatedly—moving will not even check their growth. Such trees and shrubs require years of waiting and care on our part. We save you those years and produce the choicest specimens of deciduous and evergreen trees and shrubs.

“Landscapes Without Waiting” if You Live within 500 Miles

We have every facility for the complete execution of large plantings within this radius. Our book “Landscapes Without Waiting,” unusual in text and illustrations, and costing one dollar a copy to produce, will be sent free to those who contemplate planting soon, within 500 miles of Chicago. We must request 50 cents for it from persons further away, rebated on first order. Write us for the book today.
